Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with bose 321 manual series iii . To get started finding bose 321 manual series iii , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

bose 321 manual series iii

You may need them if you ever contact Bose Service. Notify Bose or your authorized Bose away. For contact information, refer to the address sheet included in the carton. The plug marked RIGHT goes into the speaker placed to the right of your TV. Netherlands Svenska 4. Insert the remaining single plug into the connector labeled SPEAKERS on the back of the Acousti mass module. Netherlands Svenska 4. On the other end of the cable, make sure you can see the arrow on top of the plug. Yellow Note There may be other kinds of video connectors on your TV that offer higher resolution than Composite. To use either SVideo or Component connectors, you need the appropriate cables. A red and white audio cable may a or may not b already be attached to these connectors. c. If there are no AUDIO OUT connectors at all, continue with on page 22. Netherlands Svenska To connect another component In addition to your cable or satellite box, you can connect a second component, like a VCR. For this higher quality audio, you need a digital audio cable that works with your component. Such cables are available at most electronics stores. The example here shows an Optical digital connection only. Netherlands Svenska To use video pass through This calls for another composite cable or two SVideo cables, which are available at most electronics stores. Be sure to match red to red and white to white. Note In addition to this connection, you can make a digital AUDIO OUT connection from the TV to the media center. Be sure to match red to red and white to white. You may need to raise the ends and adjust the position to get clear reception. Netherlands Svenska 3. Press firmly to attach the antenna loop to the provided stand. Small tabs on the antenna ring fit into notches on the stand. 4. Voltage variations and spikes can damage electronic components in any system. Note Surge protectors are available at most electronics stores. <http://extramilepropertymanagement.com/userfiles/92-mustang-repair-manual-pdf.xml>

Bose AV321II Media Center Home Entertainment System This unit will only include the following Acoustimass subwoofer, Bose remote control, manuals, 2 The AV321 and AV321 GS media centers are to be used only with the PS321 or Home Theater System Bose 321 GSX SERIES III Owners Manual.Reload to refresh your session. Reload to refresh your session. Using the online preview, you can quickly view the contents and go to the page where you will find the solution to your problem with Bose 321 Series II. To start viewing the user manual Bose 321 Series II on full screen, use the button Fullscreen. However, if you do not want to take up too much of your disk space, you can always download it in the future from ManualsBase. The option to print the manual has also been provided, and you can use it by clicking the link above Print the manual. You do not have to print the entire manual Bose 321 Series II but the selected pages only. paper. If you want to quickly view the content of pages found on the following pages of the manual, you can use them.

It will help you set up and operate your system properly, and enjoy all of its advanced features. Save your owner's guide for future reference. WARNING To reduce the risk of fire or electric shock, do not expose the system to rain or moisture. WARNING This apparatus shall not be exposed to dripping or splashing, and oThese numbers are allocated according to where the player and disc are sold.Save all packing materials, which provide the safest way to transport your system. Check to be sure your system includes the parts shown in Figure 1. If any part of the system appears damaged, do not attempt to use it. For Bose contact information, refer to the address sheet included in the carton. WARNING To avoid dPlacing the media center CRefer to the list of offices included in the product carton. Connecting the Acoustimass module to the media center Plug one end of the Acoustimass module cUnwind the wires for each antenna to provide the best reception. Figure 10

Antenna connections Note An outdoor antenna may be used in place of the supplied indoor antennas. To add an outdoor antenna, consult a qualified installer. Follow all safety instructions. Otherwise, continue. 1. Connect one end of the supplied stereo cable. Before you proceed, you must determine if your TV has audio output jacks. Consult your TV owner's guide if you need assistance. You will need a Y adapter cable available at electronics stores to connect audio to the mTo turn on the progressive scan feature, see "Video options" on page 48. For the highest quality video from DVDs, you may want to use a component video connection between the media center. Use an optical digital cable or a coaxial digital cable, as appropriate, to connect this output to the digital input on the media center. You can purchase the required cables at a local electronics store. On the media center rear panel, an optical digital cable connects to the OPTICAL jack. A coax.

Used Very Good Return within 14 days, the Buyer is responsible for all the shipping charge. Thank you very much Please try again. Please try again. Please choose a different delivery location. CDs, VHS tapes, and even mono TV programs, that weren't recorded in surround sound Register a free business account Please try your search again later. Half the size of the original 321 systems speakers, Bose patented Gemstone speaker array works in concert with the systems TrueSpace surround processing to deliver a spacious, multichannel presentation from just 2 visible speakers and a hideaway Acoustimass module. Using Bose TrueSpace proprietary digital processing circuitry, the 321 GS.II system improves the sense of spaciousness imparted by stereo recordings and exciting movie effects from Dolby Digital and DTS surround encoded materials. Yet its few parts require little effort to set up, so you can enjoy your new systems performance right away it even comes with a helpful system setup and demo disc. Progressive scanning, referred to as 480p for the number of horizontal lines that compose the video image, creates a picture using twice the scan lines of a conventional DVD picture, giving you higher resolution and sharper images while eliminating nearly all motion artifacts. Proprietary Videostage 5 decoding circuitry goes beyond conventional digital technology to bring new life to old movies and music. It gives you a surround sound experience from practically any source, including older media such as videotapes, stereo CDs, even mono TV programs. Advanced postprocessing techniques automatically deliver a clear, onscreen audio center image and balanced surround sound, similar to that of a 5.1 encoded DVD. In the Bose Acoustimass module, 2 downward firing drivers give you powerful performance for the lowest audible notes and effects. And proprietary Bose technology ensures that you hear with clarity the proper balance of deep lows from all channels for music and movies.

Hide the module almost anywhere, even behind furniture, and all the sound seems to come from the small cube speaker arrays. If you have other Bose hardware already in place a Wave music system, a 321 Series II DVD system, or a Lifestyle system you can hook it up to this 321 GS.II system using an optional 50 foot Bose link B connection cable to extend your entertainment to an additional listening area. You can also expand upon the 321 GS.II system later by integrating it with a Lifestyle system. Note Bose recommends that you maintain at least 3 feet 1 meter of space between the 2 speakers with no more than 3 feet 1 meter between each speaker and the edge of your TV screen. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Fabio Arturo Penaranda 4.0 out of 5 stars Had heard it displayed in Bose store. At home, hooked to my new home theater system, it blew me away!!!! I can't get enough of it. I have a 1400 square foot home, open floor plan and it more than fills the space. Get the dandy floor stands The equipment even though many years old, was in good working condition. It will help you set up and operate your system properly and enjoy all of its advanced features. Save this owner's guide for future reference. WARNING To reduce the risk of fire or electric shock, do not expose the system to rain or moisture. WARNING Do not expose this apparatus to dripping or splashing, and do not place objects filled with liquids, such as vases, on or near the apparatus. The exclamation

point within an equilateral triangle alerts the user to the presence of important operating and maintenance instructions in this owner's guide.

CAUTION To prevent electric shock, match wide blade of plug to wide slot, insert fully. **CAUTION** Do not place any naked flame sources, such as lighted candles, on or near the apparatus.

CAUTION Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure. The DVD player should not be adjusted or repaired by anyone except properly qualified service personnel. Class B emissions limits This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations. Batteries Please dispose of used batteries properly, following any local regulations. Acoustimass module serial number Media Center serial number Save all packing materials, which provide the safest way to transport your system. Make sure your system includes the parts shown. **WARNING** To avoid danger of suffocation, keep the plastic bags out of the reach of children. As you identify them, you may want to place a check mark in the box next to the name of each part. If any part of the system appears damaged, do not try to use it. Remote control and batteries. Rubber feet for speakers. Setup disc Speaker cable Acoustimass module cable. Acoustimass module power cord. Stereo audio cable. HDMI video cable Composite video cable. AM antenna and stand. FM antenna **CAUTION** Do not plug the Acoustimass module into an AC power mains outlet until all other components are connected. 6. Continue with on the next page. Fastener screws 3 This may be located on the side or rear connector panel of the TV. 3. Follow the directions that are appropriate for your TV or TV with HDMI TV without HDMI on page 14 on page 15 Match the wide side of the plug to the wide side of the connector. 2. Insert the other end of this cable into the HDMI connector on the media center.

TV with HDMI Bose logo 5 Note If you make this HDMI connection, you do not need the supplied yellow Composite video cable to make any connections. **DO NOT** use either of the two **ONLY PASSTHROUGH** connectors on the back of the media center for video from a component. Neither **SVideo** nor **Composite** signals can pass through the HDMI cable to the TV. Note There may be other kinds of video connectors on your TV that offer higher resolution than **Composite**. To use either **SVideo** or **Component** connectors, you need the appropriate cables. These cables are available at most electronics stores. 2. Plug the Composite video cable into the yellow **VIDEO IN** connector on your TV. Note If there is just one **Composite Video In** connector on your TV, it may be in use already for another video component. You can disconnect that component from the TV, and see "To use video pass through" on page 21. TV without HDMI Yellow Yellow Leave the video from your component connected to your TV. 5. Select the audio cable that has red and white plugs at each end. 5 Connecting a cable box or other component What you need to use Stereo audio cable Media center Your cable box, satellite box, or other component White plug Red plug A red and white audio cable may or may not already be attached to these connectors. c. If there are no **AUDIO OUT** connectors at all, continue with on page 22. 3. To use the **AUDIO OUT** connectors, follow as appropriate. a. If an audio cable is already attached Disconnect the cable from the TV only. b. If an audio cable is not yet attached Connect the cable to your cable or satellite box. Be sure to connect red to red and white to white. OR a. b. 6 For this you need another audio cable with red and white plugs, available at most electronics stores. 1. Use this additional cable to connect to the **AUDIO OUT** on your component.

White plug Red plug White plug Red plug For this higher quality audio, you need a digital audio cable that works with your component. Such cables are available at most electronics stores. 1. Identify the digital connector on your component as either an **Optical** or **Coaxial** connector. 2. Be sure to use the right cable for this connector. Note If your component has an **Optical** and a **Coaxial** connector, use either one but not both. 3. Connect one end of your digital cable to the digital **AUDIO OUT** connector on your component. Be sure to keep the red and white audio cable connected. This

allows you to hear the audio if the program audio is not digital or the digital signal is interrupted.

4. Locate the appropriate digital AUDIO IN connector, labeled D, on the system media center. If your Optical component is neither of those, you need to select your component in an onscreen System menu. See "Getting digital audio from a source" on page 45. Coaxial Optical OR Coaxial The example here shows an Optical digital connection only. To use video pass through This calls for another composite cable or two SVideo cables, which are available at most electronics stores. Be sure to use one matched pair as shown here DO NOT use either of the two ONLY PASSTHROUGH connectors on the left if you have made an HDMI or Component connection VIDEO OUT TO TV. Continue with on the next page. Video in from your component Video out to your TV 6 Note If you have already connected the audio cable provided with the system, you need another cable for this connection. These cables are available at most electronics stores. 6 Connecting audio from your TV as an option What you need to use Audio cable Media center Your TV 7 Be sure to match red to red and white to white. Note In addition to this connection, you can make a digital AUDIO OUT connection from the TV to the media center.

For more information, review "To get digital audio from the component" on page 20. Continue to use your TV speakers for TV program audio. White plug Red plug Be sure to match red to red and white to white. 3. Use your TV remote control to turn the TV speakers down to minimum volume. White plug Red plug You may need to raise the ends and adjust the position to get clear reception. For AM 1. Select the AM antenna and stand. On 220240V models only, turn the POWER switch to on . On dualvoltage systems only, set the voltage switch for the power that is appropriate to the region where you use the system. 3. Plug the other cable end into the AC mains power. CAUTION Bose recommends using a safety agency approved surge protector on all electronic equipment. Voltage variations and spikes can damage electronic components in any system. The light turns off briefly as you press each key. 7. Make sure the light turns off completely after all digits are entered. If the light blinks now, the code is invalid. If it performs both operations, this code is correct. Write the code numbers below If this code does not work, repeat steps 58 using a different code for your TV. In some cases, the same brand of DVD or VCR device codes can work with a changer. The light turns off briefly as you press each key. 4. Make sure the light turns off completely after all digits are entered. If the light blinks instead of turning off, the code is invalid. Write the code numbers below If this code does not work, repeat steps 25 using a different code for your component. AUX AUX or AUX AUX Note If you do not see the DVD video on your TV screen, change the Video Input on the TV. Or use the button for Video Input on your TV remote control. For more information, refer to the owner's manual that came with your TV. If you STILL do not see the DVD image on your screen, see the problem identified as "Sound, but no picture" under Troubleshooting on page 62.

Switches between FM and AM when the radio is playing. Selects the audio from the device connected to AUX on the media center rear panel. Enters the System main menu. Displays the DVD menu for the current disc on your TV screen. Displays an onscreen program guide for any connected video devices that provide a guide. Exits the onscreen menus or information screens of other connected video sources. Moves ahead or back by one page in an electronic program guide, if one is available. Confirms the selection of a menu item. Moves up, down, left, or right in a menu or screen. Selects the next or previous item in a menu list. Pauses or resumes paused play of recorded music or video. Starts or resumes play of recorded music or video. For DVR Moves backwards a few seconds with each press. For DVR Moves forward a few seconds with each press. For TV, cable, or satellite Selects the channel of the numbers pressed. For MP3 Holding down the button displays or dismisses artist and title information on the media center display panel. For TV, cable, or satellite Returns to the channel last selected. Starts DVR or VCR recording of the cable, satellite, or TV program that is playing. Enter Selects the next available radio preset. Eject Opens or closes the disc tray. You may need to change the TV Video Input to see the correct video. Note To prevent mid

play video disc problems, be sure the disc is clean. This is particularly important with rented DVDs.

2. On the media center control panel, press Eject to open the disc tray.
3. Place the disc right side up in the tray.
4. Press Eject again to close the tray. The disc begins to play automatically. The media center display registers disc information and progress as the play continues. Note If the display text is not in your language, see "Language choices" on page 48. Or see your TV owner's guide for instructions. Skip to the next CD track or DVD chapter, press Chapter up.

Skip to the previous CD track or DVD chapter, press Chapter down. Press Play to end the scan. Stop a disc and open the disc tray, press Eject on the media center. Keeping your discs clean Scratches or dirt on a disc can prevent it from playing properly. Wipe straight out from the center to the edge.. Do not use a circular motion For DVDs Setting Parental Control You can pass word protect some DVDs that are not appropriate for other family members. Region codes For any DVD player and DVD disc to work together, the code for the region where they were sold must match. A code symbol is marked clearly on the bottom of your system media center and on the DVD cover where it may be very small. For example, Region 1 is. Please respect the rights of the artists and other copyright holders. Ratings supplied by the MPAA The numbers above the one you select will be restricted.

2. In the System menu, select DVD Lock and enter your password.
3. Use the arrow buttons to reach Lock UnRated Discs and select Yes.
4. Move down to Lock Discs Rated Above and right to the numbers.
5. Press the up or down arrow button to select a number. Any numbers above this selection will be restricted by password protection.
6. Press ENTER to save this setting and Exit to move out of the System menu.

Parental Control Setting MPAA Rating Audience Restriction

8	No n e
7	NC17 Adult audiences
6	R Mature audiences
5	Mature teenage audiences
4	PG13 Teenage audiences
3	PG Mature young audiences
2	Most audiences
1	G General

For example, you see a person's lips move after you hear the words. The Settings menu appears on screen.

2. Move down to the audio delay icon and press ENTER.
3. Select an adjustment 18 and wait to see if this corrects the problem. Each selection makes a minute timing adjustment. It may be difficult to notice the change.

AUX AUX This prevents an echo effect from two sets of speakers playing.
