The Breville BJE510 Juice Fountain MultiSpeed with variable speeds is a smart juicer that adjusts speed to extract the maximum juice with minimal waste. A builtin smart chip increases power to the cutting disc under heavy loads so juicing is accomplished as efficiently as possible. Juicing Versatility and Power Fruit is largely composed of water, but its selling point is its nutritional value. How do you extract the juice from fruit, without leaving the nutrients behind. Breville's Nutri Disc and patented juicing system extracts more

nutrients than other juicers and transfers less than 1.8F of heat to protect enzymes and maximize nutrient absorption of select nutrients. The 900 watt motor has speeds ranging from 6500 rpm for softer fruits and leafy greens like cantaloupe or spinach to 12500 rpm for maximum extraction from denser foods like apples or beets. <http://www.willajarmar.pl/userfiles/electrolux-induction-cooktop-service-manual.xml>

A smart chip allows the juicer to sense the load and adjust power accordingly, making juicing more efficient. The uniquely designed juicing system features an extrawide feed chute that is centered over the shredding disc. This allows for more efficient juicing than systems that introduce ingredients on the side of the shredding disc. Nutri Disc with titaniumreinforced blades shreds both hard and soft fruits and vegetables with ease The 900 watt, highgrade 5 speed motor features a builtin electronic smart chip that increases power to the cutting disc under heavy loads. As a result, the filter extracts more juice and can make an 8 oz.Product features Heavyduty 900 watt motor with variable speed control from 6,500rpm to 12,000rpm 5 speed selector with LCD juicing speed guide to help maximize juice extraction Patented extrawide feed chute 3" wide juice large fruits and vegetables with little to no cutting or preparation Patented direct central feed system for maximum juice extraction Nutri Disc with titanium reinforced cutting blades, which ensures the blades stay sharper for longer, and stainless steel mesh filter basket for spinning out the pulp Noise and vibration control patented unique direct central feed system, which centers the chute over the Nutri Disc to minimize vibration and noise Heavy grade polymer body for durability Premium materials combining high grade stainless steel and diecast alloy for durability. Stainless steel body, micromesh filter, cutters, and engineeringgrade polymers 1.

2 liter juice jug with froth separator Large capacity pulp container with integrated handle Cord storage the power cord wraps around feet and clips into position under the base for a reduced countertop footprint Safety Locking Arm prevents the juicer from operating without the cover locked into place Overload protection prevents overheating, automatically shutting the machine down when it senses that the machine is overloaded All materials that come in contact with food are BPAfree, ensuring safe use Easy cleanup with the included cleaning brush.Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. AM 5.0 out of 5 stars I have some idea of comparisons. 2. Unless you are following the Gershon lifestyle SAVE your money and DONT buy a Norwalk. Theyre fabulous machines and topquality with a price that commiserates, but they are huge, cumbersome and more difficult to use. Ive also used a Champion juicer.there are diehard fans, but I cant get into the Champion line of juicing. They are better built, easier to clean, and IMO more sanitary. Once Im finished juicing, I rinse the parts in warm water, brush the basket, and toss in the dishwasher. EasyPeasy! 2. The dial to control the speed is a really big plus for me and one of the main reasons I chose this model. You can really dialitdown for greens kale, spinach, etc., and extract more green from the leafy goods. This also allows it to really knock out its competition of other machines that tout their slower masticating features. This now essentially does both. 3. The puree blade This is simple to use, just set it in, instead of the razor basket, and it does a superb job at making baby foods, applesauce, frozen banana icecream etc., etc.

This feature was the second major reason I chose this model. I own a BlendTec professional blender and the previously mentioned Norwalk. This Breville is on par with those items at a fraction of the costs with its ability to keep up and literally chew through anything Ive put in there without issue. Again, for so little money more, its worth having the larger, more capable motor which was the third big selling point from my perspective. 5. For some reason, this machine does not heat up your juices which is VERY good. Ive tested the temps and theyre minimal 23 degrees warmer than your starting point. This matters for those who juice a lot that dont want to loose nutrients. Even at the higher

speeds for 12 hours of juicing there was minimal heating up. Kudos to Breville on this. Not even the Norwalk to my surprise and dismay can keep up with that!!! CONS 1. For me, at this point, there arent any. Im a critic and would be the first in line to offer anything I didnt like or felt was a ripoff. But Im sincerely pleased and impressed with this juicer. One of the few things kitchen gadgets Ive purchased in the last couple of years that has been this well rounded, with a good design, and most importantly worth the money. I received a recommendation for this juicer from a friend who had been using an earlier Breville model for many years, and as soon as I received this model, I knew it would also last many years. I havent experienced any of the problems mentioned in the negative reviews and have a suspicion that most of them are results of misuse. For example, I have been using the product daily for a long time and the mesh basket still looks brand new. This is because I soak it in warm soapy water after each use for 5 min, then scrub with the brush that Breville provides. The people who said the condition of the mesh basket quickly deteriorated probably did not take the time to clean it properly immediately after each use.

Another problem that people mentioned in negative reviews is the motor stalling. This may be because the users turned on the machine with food already in the chute. If you read the instructions however, it mentions that you should never start the machine with the chute loaded. Always drop the food in after the blades are already spinning. This is VERY IMPORTANT and many people fail to read this before they try the juicer. A few tips if you buy this machine Be careful if you juice directly into a glass and not the covered pitcher. If you want the machine to last, dont push it to its maximum capacity for every use. The manual says the clear parts are dishwasher safe for the top rack, but my dishwasher did not get the centrifugal part or the spout clean. I would recommend rinsing all parts with warm water immediately after use. The clear produce bags from the grocery store make excellent liners for the pulp container. No need to buy the expensive liners from Breville. If youre comparing this unit to other juicers, they just dont compare. This one comes with a puree disc for the softer fruits and veggies that otherwise would end up in the pulp bin. Swapping between discs is super easy, theres no screwing bolts or anything like that, they simply drop right in and off you go. I love the extrawide chute that accommodates many items whole, and enables faster juicing and less prep. I appreciate the stainless steel construction, which does not stain and cleans very nicely in the dishwasher. The included pitcher is handy for separating the foam so you can pour a glass of freshly squeezed juice without the foam layer. I really like the speed control, which improves the effectiveness of juicing a variety of items from hard to soft. The machine is super safe, and will not run if anything is out of place. My only complaint is the NOISE. Wow it sounds like I am running a jet engine in my kitchen, but its only for a few minutes. Was this review helpful. Give me a YES vote!

Sorry, we failed to record your vote. Please try again Not sure if its going to do this with all other vegetables or if its the texture of the carrot pulp that makes it stick or what. Otherwise it does a good job, I get more juice than with my other masticating juicer, but Ive noticed the juice flavour is much more vibrant with the slow juicer, if I hadnt tried both I probably wouldnt have noticed. The carrot juice from the centrifugal is more bland in comparison. I add ginger to help that out. Cleaning it is a bit of a pain as I clean it daily, if you use it every few days it probably wouldnt be so bad. The orange stain from the carrots has built up mainly in the little spout the juice comes out of, which I find particularly hard to get into to clean. Some might not be bothered by this, its only an aesthetic issue. I have tried some vegetable oil on a paper towel to remove stains and this works quite well. I have seen others use Oxyclean to soak parts in beet stains for example for general cleaning of juicers not this one specifically. But havent tried it as for now Im trying to use more natural products. The mesh filter is turning orange, and I might have to resort to this eventually. The brush is handy. In general Id say this juicer does a good job, and doesnt take up as much space as I thought it would on the counter. Sorry, we failed to record your vote. Please try again My first juice was effortless and fun. Before deciding on this product I read many reviews, blogs, and watched YouTube videos on various products. I then went to the store to compare various brands, including

several Breville brands for ease of assembly, cleaning, etc. All in all, this product is great. The previous reviews were not joking in claiming this machine is much quieter. No, its not silent, but in comparison to many other machines, including the Juiceman, its quiet. Not to mention, my other half was sound asleep and only 10 away without a stir. So yes, its rather quiet.

My first juice with this machine included one cup of fresh beet greens and one cup of fresh basil, and this machine chewed it up without issue, actually processing it, not just spitting it out fully intact like the other machines. The clean up is nice and easy, about 10 min. The reality is that the cleanup is rather comparable to most pulp ejection juicers, BUT, this machine doesnt have any of those nuisance joints, cracks, or indents where the food is trapped like in other machines. And I very much like that the food chute is stainless steel to meet the blade bowl. The design of this product is very well thought out. I am ecstatic to have the Juice Fountain Multi Speed as a part of my continued path to better health. Thank you Breville for a fabulous machine. Its worth every penny! Sorry, we failed to record your vote. Please try again I tried to keep the pulp to use in other recipes, but that too, was a lot of work. Place a plastic bag inside the pulp section and that helps with clean up. I think I would have been better to have bought a VitaMix unit and drank the pulp all the good nutrition there Sorry, we failed to record your vote. Please try again Still in my kitchen. I dont use as much as I used to, but the thing has gotten somewhat consistent use for the 7 years I have had it and it still works great. In the disposable society we live its a good feeling to own a product of lasting quality. Sorry, we failed to record your vote. Please try again I found that because the motor is basically to the right pulp tends to pile up on the left quite easily. I had to quickly open it to push the pulp down. Besides that its a pretty awesome juicer. Sorry, we failed to record your vote. Please try again Its my first juicer and I did quite a bit of research before buying it. After using it for a week, Im thrilled, and Ive just ordered another one as a gift for my mom. It works beautifully Ive probably had more vegetables in the last week than I have in the last month.

Its so easy to get nutrients from vegetables and fruit with this machine. Easy to clean, easy to put together. The only issue I have had is that I used a compost bag to line the pulp container, as someone else suggested in their review. Its worked very well except for one time when I left the liner a little too puffy at the top. It got sucked into the machine as soon as it started up which meant I needed to take it apart and clean the filter carefully. But this was my error so just wanted to add it to my review so you wont make the same mistake. Use the liner bag, but make sure its tucked in nicely into the pulp container. I love this machine so glad I bought it. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again So you can drop a whole apple and it does all the work. Really handy and well designed. Juice is perfect! Very happy I chose this particular model. Comes with a one year warranty from Breville themselves so you don't have to buy a separate company one. Also comes with a juice recipe book which is great Sorry, we failed to record your vote. Please try again Recomendando ampliamente el producto. Recomendado para aquellos que quieren cambiar su vida. Sorry, we failed to record your vote. Please try again Anyway, the Breville BJE510XL is a really good product, made in USA, good material, not too loud and easy to clean. I like the display with the adjustable speed that allows you to manage the proper speed for any kind of food. With my juicer, began easy and fun preparing 5 or 10 juice for day. Really recommended. Sorry, we failed to record your vote. Please try again I use it quite often mostly in the mornings. I put all kinds of hard veggies in it and its amazing. This is the only juicer anyone needs!! Easy to clean too!! Great buy and great quality! Sorry, we failed to record your vote.

Please try again We gave our Jack Lelaine Juicer away as this Juicer is stronger and so much more powerful than the others. Sounds like a jet taking off even at half speed and does a fabulous job of juicing anything weve tried so far. and thats a lot. We veggie juice every day and add fruit as well. Takes minutes to get a glass of great juice from prep to sipping very little prep needed. Love it and would recommend it to anyone. Sorry, we failed to record your vote. Please try again It is as quiet as

any juicer can be. It is very fast, and the pulp is quite dry. The cleanup is very rapid, all you have to do is rinse it under running water and it is clean because nothing sticks to it and there are no corners for pulp to get caught up in. I don't use a dishwasher. Just be very careful to not brush your fingers against the blades because they are VERY sharp. Also I really like the plug on the end of the cord, it is so easy to grasp. The variable speeds are very nice and I think aid in getting the most juice from the fruit and vegetables. It is a nice looking unit also. Would I buy again Oh yes! Definitely a winner. I have had other brands through the years but this is the best! Sorry, we failed to record your vote. Please try again Received the juicer lightning fast from Prime and set it up and then we juiced. Cleaning only 4 parts so it's very easy, performance has 5 settings for all different types of fruits and veggies. Don't hesitate just buy you won't regret it. Sorry, we failed to record your vote. Please try again In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. I decided to purchase this juicer because it has an excellent Consumers Guide review. Thus it seemed ideal for providing the power needed for the Power Fast I have just begun. It is easy to take apart for cleaning and the four parts requiring washing are dishwasher safe.

The chute is large and can easily accommodate a good sized garden tomato, whole cucumbers and bunched leafy vegetables. What really impressed me was the speed with which vegetables and fruits were juiced. I particularly liked the choice of five different speed settings since this prevents splattering. I made one gallon of vegetable juice using a variety of produce ranging from tomatoes, kale, carrots, celery, peppers, mustard greens, cucumbers and beets plus one apple. All within a 10 minute time span. Cleanup was amazingly easy. In short from start to finish I juiced all vegetables thus producing one gallon of liquid, removed all pulp, washed and dried removable parts, reassembled and stored the machine in ONLY twenty five minutes. The result was a tasty drink full of vitamins and minerals. I can truthfully state that this machine does EVERYTHING that the literature and reviews say it does. With all of this in mind, I feel quite comfortable recommending it to anyone who wishes to juice a large volume of fruits and vegetables within the least amount of time and who also prefers fast and easy cleanup. Last, but not least, the machine appears to be very well made, does not budge when used, and is quite attractive on the shelf. Considering all of this, my purchase was an excellent choice at a very reasonable price. For those that are having a problem juicing tomatoes, please remember to use the lowest setting. It is very sturdy but light weight. The appearance is stainless steel and black, which I like. I love the 5 speeds for the different textures I will be juicing. It was very simple directions to follow and cleaning was a breeze. Just take it apart and place in warm soapy water. The brush works that comes with product is great for the strainer. It is a powerful machine, but with low noise in usage. I am hoping that I can make ice drinks also, but need to read manual yet. I would recommend this for the amateurs, like me, since I am just starting to juice.

It is cost efficient, well worth the investment. I am not pleased that there is only a one year warranty on the life of the motor. Ebay offers extended warranty at a low price which I will be purchasing. This is it! I bought the juicer as I wanted to try juicing and I wanted something easy to operate and easy to clean. This juicer did not disappoint. Wow! The juicer was so easy to use and I couldn't get over how quiet it was when in use. The juicer handled seeds, skin etc and there was just pure juice. There is a dial that allows ease in juicing everything from citrus foods to denser fruits and vegetables with ease and no sticking. I loved the fact that the parts were dishwasher safe and it was simple to assemble and use. I would recommend this juicer highly. It's a pleasure to use. No hassle cleanup when compared to your typical lesser quality juicers. Very well made and looks good too. The motor is great and not terribly noisy. I especially like being able to select the amount of power to use depending on the density of the fruit or vegetable. No waste you can tell that the extraction is efficient because the pulp is dry in the waste catcher. The only thing better. I plan to advance my juicing skills as I am new to this whole thing. I did own a cheaper less powerful juicer and it left a lot

of pulp. I purchased a Jack La L. juicer and sent it back after reading blogs re Breville. The Breville also is easy to clean and the BJE510, definately lives up to the claims of all those bloggers. HAPPY SO FAR and will continue to experiment with other veggeis and fruit. Verisign. The blades are super sharp so becareful. Also, you can juice a whole orange with peels but I wouldnt recommend it as itll hurt the motor.thin skins you can put in whole.but then it tastes bitter. Watch the review here Easy to clean, juices almost anything Little loud Like Share More 2 comments Naomi S. Breville 7 years ago Great video.

Shame Oscar didnt like his watermelon juice Just a tip for you, you can use an old shopping bag in the pulp container. When you finished juicing you can just lift the bag of pulp out. Read more of the container and then youll have one less part to wash. Happy juicing! Like Report The Tings 7 years ago Thats a fantastic idea and weve since been doing that.washing up is such a breeze. Yea its a shame he didnt like it but Ive been sneaking in some celery into his orange juice and hes been drinking it hehehe. Like Report Similar opinion. Write a review on ProductReview.com.au ! Looking for Juicers. Read the reviews for Torus T1000 Classic Slow 17 reviews Ad Celtic Hero Its fantastic and extremely fast. Though,you have to ensure that seeds are not fed into the shute, if you wish to prolong the life of the blades. But the machine will rip through hard seeds, although it is not recommended in the user manual. If you line the pulp container with a plastic bag,cleaing is a breeze and shou. Read more ld take less than 5 minutes. The pulp from this juicer is reasonably dry and the juice taste great. A whole lot better than the juice you get from bottles at the supermarkets. To sum up, the Breville BJE 510 is an excellent machine for the money. It also has an attachment to create smooties if you are into these. Its got my vote10 out of 10! Fast juicing, easy cleanup. Literally sounds like a jet engine taking off. Would not recommend you juice at night if in an apartment. Like Share More Similar opinion.I am making every morning 16 ounce glass of juice from apples, oranges, beetroots, or carrots. It extracted well. It is easy to clean and easy to use. Highly recommend! 1 like Share More Similar opinion. Write a review on ProductReview.com.au ! Find out how Breville ikon MultiSpeed BJE510 compares to other Juicers Know better, choose better.

Compare all Honestreviews27 AU 15 reviews 26 likes I personally find juicing is a wasteful process, you seem to throw out a lot of left over product, but we have found that our compost bin is extremely productive now, so thats a bonus. Its size is an issue, unless youre happy to keep it on the kitchen bench all the time, its the kind of machine you put back in the cupboard and feel its too much effort to get it back out. But thats just me personally. It does the job it states it will do, and it does it well. It does exactly what it states it will do, and it does it well. Very large, bulky piece of equipment. 1 like Share More Similar opinion. Write a review on ProductReview.com.au ! nvp Sydney The sound when you turn it on is like a jet engine, you know that youve got some serious stuff going on there. It extracts juice beautifully with the least possible waste. There are 5 different levels for different types of fruit which helps maximise the juice extracted. The best thing is it helps me to sneak some fruit and vegetable in my boys diet who never eats fruit and very little vegetable. Quick and easy It is a bit heavy to move around. So if you want to buy it, make sure you make some room for it on your kitchen bench. Like Share More Similar opinion.But they are totally worth every cent i paid. The juicer takes whole fruits i.e whole apples with skin on and pears etc. There is a pulp container which seperates the pulp from the juice. I have once used the leftover pulp to make a cake and it was fantastic. Normally i put the Pulp in my vegetable garden which mulchs up nicely. The Juice is pure and not lumpy. I juice our fruits every couple of days and store in the fridge to have a glass each morning. Our favourite is grape, apple, pear and pineapple. I dont have a problem at all cleaning this, just rinse straight after use in hot water and is clean as a whistle. I highly recommend this juicer, after using this product i dont like the bought juice anymore.

Easy to use, great taste and healthy. Its bulky, but so are all juicers. Like Share More Similar opinion. Read the reviews for Torus T1000 Classic Slow 17 reviews Ad Sada Greater Melbourne

Metropolitan, VIC 675 reviews 113 likes If you buy this one, you wont need another juicer. We love to use it during the summer time and the fresh fruit juice smells fantastic. Its easy to clean and all the parts except the main motor can be put in the dishwasher for easy cleaning. It looks good too and is easy to use. If you really are going. Read more to be drinking a lot of juice and will use it regularly, then its def worth it. The brush with the spatula on the handle is really useful for cleaning the tight places. You can put a plastic bag in the pulp waste container which makes the cleaning easier. If it was selfcleaning, it would be perfect. Maybe a bit noisy, but thats not really a problem for me because its really powerful and very quick. When you place the plastic bag for the pulp container, make sure its a fairly small bag which just covers the container, otherwise, you will be juicing the plastic bag when you are juicing your fruit. 1 like Share More Similar opinion.
